## Nomba (YC W17)

[Nomba checkout](#)

[Nomba website](#)

### Product designer

March 2025 – Present

- Designed a Nomba-powered loyalty program for large retailers, issuing branded loyalty cards with 10–20% discount rewards to boost customer retention and help merchants raise low-cost float.
- Designed an expense management system supporting multi-level transfer requests and approvals, enabling finance teams in large corporates to process expenses efficiently and with full visibility.
- Led the redesign of the checkout experience, enabling stable-coin and multi-country payments, boosting transaction volume by 20% and cutting errors to 7%, enhancing both user experience and business efficiency.
- Enhanced Nomba terminal features, including card pre-authorization, manual transfer approvals, loyalty card payments, and multi-currency (USD & NGN) card acceptance, improving transaction flexibility and merchant efficiency.
- Designed Nomba's responsive marketing website, creating its visual system, reusable interface components, product storytelling, and conversion-focused user journeys across desktop and mobile.

## Redpay by Redtech

[Redpay mobile](#)

[Redpay Website](#)

### Product designer

November 2025 – February 2025

- Led end-to-end design of the Redpay Mobile App MVP in just 2 weeks, enabling the company to secure a strategic deal with its parent company, UBA Group.
- Led the end-to-end product design across key journeys including onboarding, wallet setup, money transfers, and terminal management, ensuring a seamless omni-channel experience between mobile and POS users.
- Delivered high-fidelity prototypes and scalable design systems that streamlined developer handoff and stakeholder presentations, directly contributing to business growth and strategic alignment with UBA.

## Raven Bank

### Product designer

May 2023 – February 2025

- Revitalized the Raven Bank website design elements, strategically emphasizing diverse offerings for personal banking and business solutions; led to more customer inquiries by nearly 30%, enriching overall service delivery
- Initiated a comprehensive overhaul of the Raven Bank app's interface while incorporating sought-after features including scheduling payments, savings, cards, rewards which directly Established customer satisfaction, these upgrades resulted in an increase of active users by over 25% within three months

- Pioneered the design of a dual-mode business banking application featuring Pro and Lite settings; enabled 5,000+ users to effortlessly access point-of-sale services in Lite mode while offering advanced invoicing tools in Pro mode
- Designed a streamlined identity verification interface that automated data entry, leading to a reduction of 40 hours per week in manual workload for customer success teams and enhancing overall efficiency
- Created a responsive interface facilitating quick self-service options for account management tasks including the emergency blocking function used frequently by hundreds of users each month without reliance on support agents
- Built a web application for personal banking users, that allows seamless account management regardless of location or device used, enhancing customer accessibility and driving an increase in daily active users by over 20%

## **Outlit AI - (YC W25)**

[Outlit AI website](#)

### **Product designer**

**January 2023 - April 2023**

- Designed a contract management software aimed to assist users in analyzing contracts, identifying risks, and negotiating more favorable prices
- Created a comprehensive main dashboard that features added contracts, built workflows for viewing contracts, uploading multiple documents, and sharing contracts with external partners such as legal advisors
- Devised a Copilot AI view, which facilitates collaboration and allows for a side-by-side comparison of Outlit AI with the contract under analysis
- Users can interact with the AI to negotiate better prices and compare up to five contracts, with options to edit and create new variables for comparison

## **Plero**

[Plero website](#)

[Plero dashboard](#)

### **Product designer**

**August 2022 - December 2022**

- Rolled out an interactive donation platform simplifying transactions between donors and targeted organizations such as schools and faith-based groups while decreasing average transaction time from five minutes down to two minutes per contribution
- Engineered an admin platform enabling institutions to monitor and manage incoming donations monthly; streamlined fund creation processes for users resulting in a 35% increase in contributions
- Engineered a no-download-required approach using innovative QR technology, increasing transaction speed by 30% and simplifying the donation process for users preferring not to use apps
- Initiated the development of a dedicated website promoting key attributes beneficial to both contributors and partner organizations involved with Plero's mission

## Ingressive for good

### UIUX intern

February 2022 - July 2022

- Acquired practical knowledge of user-centered design methodologies by engaging daily with expert designers; improved understanding of customer needs which led to increased satisfaction during usability tests for internal applications
- Effected the initiative to integrate cross-platform accessibility for documents, which allowed users to access files seamlessly across devices; this functionality saved over 15 hours weekly on manual file transfers
- Secured certification for exemplary project completion
